

Morgan Evans

Chicago, IL • morganfevans@gmail.com • [linkedin.com/in/morganfevans](https://www.linkedin.com/in/morganfevans) • <https://morganfevans.github.io/>

EDUCATION

University of Minnesota, Twin Cities

Minneapolis, MN

B.S. Aerospace Engineering and Mechanics

TECHNICAL SKILLS

Programming: Python, Matlab, NumPy, Pandas, Matplotlib

Engineering: Simulink, Solidworks, AutoCAD, AutoDesk Inventor, Fusion360, Arduino

Tools: Git, GitHub, Microsoft Excel, Google Colab

Laboratory & Testing: Instron, rheometers, TRIOS, Bluehill Universal, oscilloscopes

PROFESSIONAL EXPERIENCE

3M

January 2025 - June 2026

Technical Aide - Engineering & Data Operations

Maplewood, MN

- Developed advanced Excel tools that reduced engineering data analysis time by 80%.
- Developed Python-based automation and machine learning solutions for proprietary AI-driven research initiatives.
- Led onboarding and training for technical aides, interns, and new hires while standardizing laboratory documentation.
- Performed adhesive characterization using Instron systems, rheometers, and microscopy, supporting classified automotive and consumer materials research.
- Executed peel, tensile, viscosity, and dynamic mechanical testing for failure analysis and optimization.

AMAAZE Labs

May 2025 - December 2025

Lead Research Assistant - Data Processing Team

Minneapolis, MN

- Developed Python automation tools that reorganized and validated 7,000+ research files, creating a structured dataset for research and machine learning applications.
- Built scalable Python workflows for scientific data processing and future public dataset releases.

University of Minnesota

September 2023 - May 2026

Lead Teaching Assistant - Department of Physics & Astronomy

Minneapolis, MN

- Taught and mentored 300+ students in undergraduate astrophysics courses.
- Communicated complex scientific and mathematical concepts in a clear and accessible manner.
- Supervised and coordinated a team of 4 teaching assistants, ensuring consistent grading and course operations.

PROJECTS

eVTOL Flight Simulator & Simulation Platform

September 2025 - May 2026

Capstone Project - Aerospace Vehicle Design

Minneapolis, MN

- Collaborated with Acron Aviation engineers to translate business requirements into technical specifications.
- Led a five-member multidisciplinary team using Agile workflows and Git/GitHub to coordinate software development and integration.
- Engineered a desktop flight simulator using Python, PyQt, and JSBSim to model aircraft dynamics & pilot interaction.
- Developed real-time flight instrumentation, telemetry displays, and data logging pipelines for engineering analysis.
- Designed a modular software architecture to enable future controls, instrumentation, and advisory system integration.

LEADERSHIP & PROFESSIONAL AFFILIATIONS

Founder & Director, Gift of Life Bone Marrow Donation Registry, *University of Minnesota*

2023 - 2026

Peer Mentor, Alpha Sigma Kappa - Women in Technical Studies, *University of Minnesota*

2022 - 2026

Active Member, American Institute of Aeronautics and Astronautics, *University of Minnesota*

2022 - 2026
